

ABSTRACT OF THE DISCLOSURE

A machine for stencil printing includes: a control panel for setting stencil making conditions and printing conditions; a stencil making section making a stencil sheet based on the stencil making conditions; a stencil winding section wrapping the perforated stencil sheet around a printing drum, the printing drum comprising a storage section; a printing section including a printing conditions adjustment section, the printing conditions adjustment section adjusting the printing section based on the printing conditions; and a control section storing the stencil making conditions of the stencil sheet and the printing conditions into the storage section at the time when the perforated stencil sheet is wrapped around the printing drum, the control section adjusting the printing condition adjustment section to print based on the stencil making conditions and the printing conditions in response to a direction of start of the printing processing.
